

Features

- Full secure document registry
- Automated document load and indexing
- Comprehensive text search
- Text content analysis
- Object profiling
- Association and link analysis
- Determination of associations through multiple degrees of separation
- Telephone call record analysis
- Area canvass – management of geographic area enquiry
- Admiralty reliability rating
- Event analysis – time based event or commodity flow
- Case and investigation management
- Task management/workflow
- Attachments of any supported file or media type
- Custom intelligent data capture forms
- Form designer module
- Flexible data import capability
- Selective data export capability
- Custom report builder
- Remote web and handheld GPS/image capture device support
- Secure XML data interchange – with mapping to XML standards (NIEM)
- Military strength 'need to know' data security
- Flexible user functional security matrix
- Full international language support (full Unicode)
- i2 Analyst's Notebook visualisation (ANACAPA standard)
- Automated software distribution option
- Multiple database support (Oracle and MSSQL)
- Multiple platform support including Citrix options

Benefits

- Significant operational cost benefit
- Low deployment overhead
- Costs of change reduced by customisation and form design tools
- Operational and strategic intelligence use
- Actionable intelligence outputs
- Rapid customisation under customer control
- Internal investigation support with confidence in security
- Flexible multi-layer security to match any organisation structure
- Automated capture mechanisms reducing data-entry bottlenecks
- Seamless integration with key analysis tools including i2 Analyst's Notebook
- Quality entity identification via powerful duplicate checking
- Maximised search hits with all words returned from text content
- Time savings with powerful analysis and filter of bulk text information
- Intelligence sharing capability via import and export standards
- Mobile options with disconnected data capture
- Platform independence

complete solution for intelligence and investigation specialists

Crime Investigation
Prison Intelligence
Identity Fraud
Military Intelligence – strategic
Military Intelligence – tactical
Military Policing
Transport Crime
Financial Fraud

Counter Terrorism
VIP Protection
Fisheries Protection
Wildlife Protection
Critical Infrastructure Protection
- Surveillance Detection
- Counter Reconnaissance

HOW SiD WORKS

SiD is an Intelligence and Investigation Solution that includes everything necessary to support the intelligence cycle. SiD offers off the shelf deployment but with flexibility to model threats in any domain. SiD has proven success in a wide range of such domains (from military intelligence and drug enforcement to resource protection). SiD offers considerable cost benefit payback. SiD provides high quality intelligence and robustly audited investigation outputs.

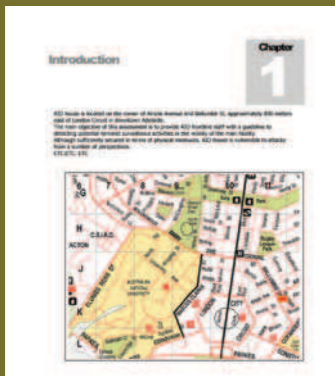

1 | Planning and Direction

- Best practice process checklists
- Task management and process flow model
- Task assignment notification
- Intelligence collection planning
- Support for ORBATs military planning
- Dynamic Intelligence model which allows change on the fly

5 | Dissemination

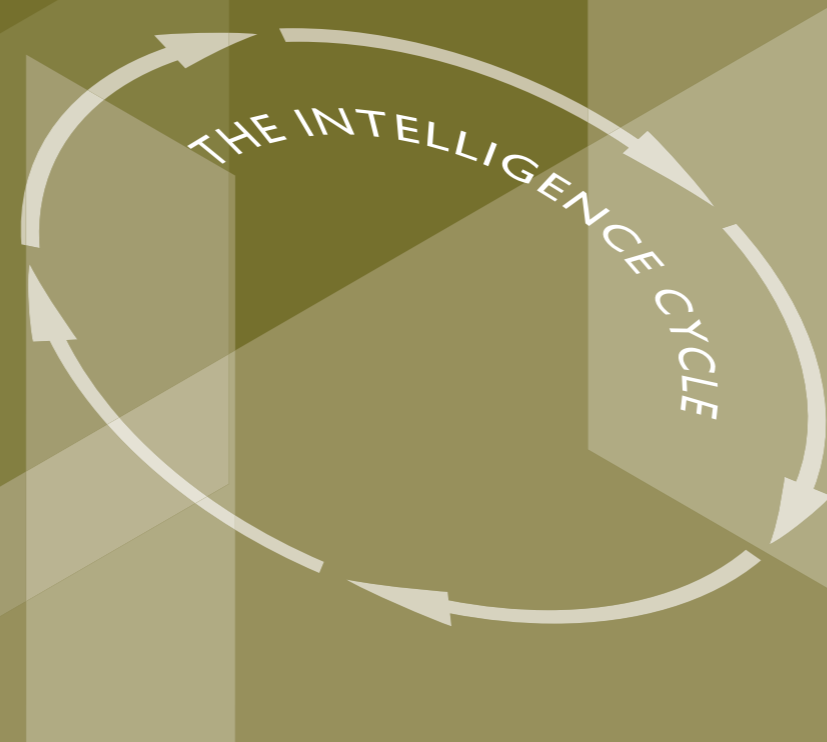

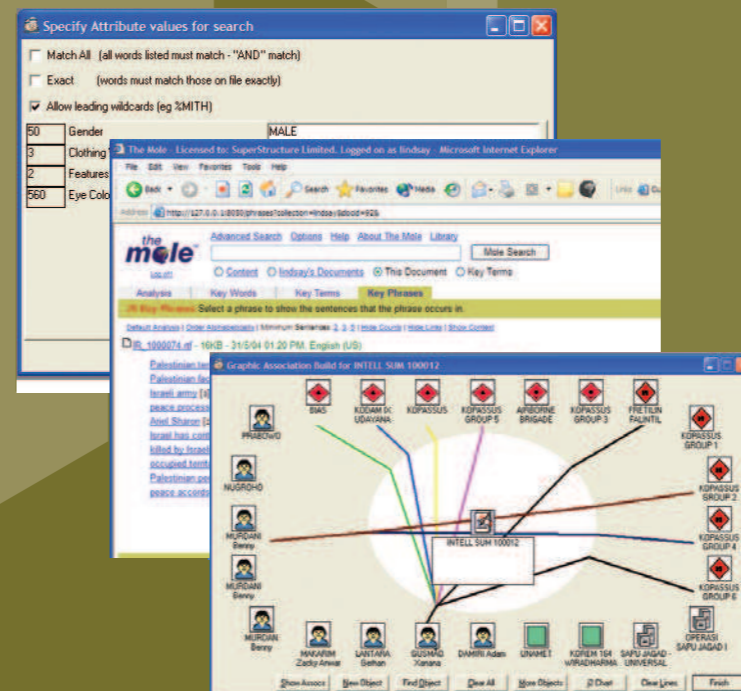

- SiD2SiD inter-agency intelligence sharing
- Custom reporting – build your own reports from your SiD intelligence model
- Export in spreadsheet or XML formats
- Over 50 standard reports with variable selection criteria

Directive ID	Type	Status	Assigned To	Created	Last Modified	Priority
1001	Task	Completed	John Doe	2010-01-01 10:00	2010-01-01 15:00	High
1002	Task	In Progress	Jane Smith	2010-01-02 09:00	2010-01-02 14:00	Medium
1003	Task	Pending	Mike Brown	2010-01-03 11:00	2010-01-03 12:00	Low
1004	Task	Cancelled	Sarah White	2010-01-04 08:00	2010-01-04 09:00	High

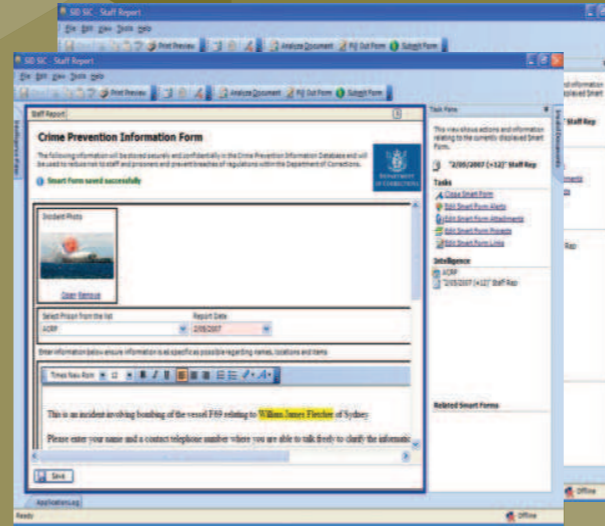

4 | Analysis and Production

- Association mining to any level of separation
- Point and click association build
- Integrated timeline analysis
- Integrated link analysis
- Full complex search with narrow down capability
- Search text contents without complex search criteria
- Project based electronic filing and categorisation

2 | Collection

- From unstructured information to structured intelligence
 - Automated unstructured text import
 - Automated entity extraction
 - Intelligent topic-driven collection focus
 - Powerful text content analysis
- User defined custom forms with embedded intelligence
- Full form design capability – with database synchronisation
- Secure remote data capture across the Internet with off-line operation
- Hand held GPS position and image capture option
- Security classification and data protection from point of capture
- Import from multiple data sources - including telephone call records
- Attachments of any media or other file types
- Full multi-language support

3 | Processing and Exploitation

- Military strength security – 'need to know' security matrix
- Visual analysis – Analyst's Notebook integration powered by i2
- Secure open architecture data sharing – via standards-based XML data interchange
- Selective period for current interest view
- Comprehensive search
- Full multi-language support
- Full audit trail
