

# Superstructure Group - i2 Training Schedule 2009

Superstructure Group offers high quality i2 training through the specialist services of Mark Boyce of Intelligence Solutions Ltd, a Wellington-based company which provides services nationally and internationally. Due to our commitment to quality, Intelligence Solutions is our only authorised i2 training provider - so please ensure you are getting service from this leading company in the New Zealand market.

Mark Boyce brings to your training 28 years of experience in the NZ Police both as a Detective and as an Intelligence Analyst. He has held senior Police roles including National Intelligence Trainer, Intelligence Manager of the National Bureau of Criminal Intelligence and National Manager Business Analysts. Coupled with this experience Mark has been a real-world user and trainer of i2 products across the NZ government sector for 19 years and is a UK Certified i2 Trainer.

This unparalleled experience ensures your organisation not only receives top quality software training, but also advice and guidance on its practical application in the NZ and international context. More significantly Mark has the background and business experience to provide you with top to bottom development of your intelligence or investigative capability, including:

- **i2 Software Training** and advice on i2 best practice standards and application in your organisation.
- **Intelligence Capability Building** – from an independent review of your current capability or performance to development of standards, processes and methods specific to your business.
- **Intelligence Education Programme** for operational staff and analytical methodology training for intelligence staff (ensuring organisational buy-in and capability at all levels).
- **Intelligence Analysis Techniques** - training in analytical methodology, providing the core skills required to analyse information and produce actionable intelligence.
- **Business Analysis** including business process refinement and business systems and tools.

The value from your training investment is greatly enhanced when backed by this rigorous top to bottom approach developed through decades of experience.
